

App Smack Down

Bard Mobile - free apple or android

BARD Mobile app provides access to braille and talking books directly from the NLS Braille and Audio Reading Download (BARD). BARD contains nearly 50,000 books, magazines, and music scores in audio and braille formats, with new selections added daily.

With BARD Mobile, you can play the audio materials on your iPhone, iPad, or iPod Touch. If your device is connected to a refreshable braille display through Bluetooth, you can also read the braille materials available on BARD

KNFB Reader – \$99.99 apple

- KNFB Reader - Reads most printed documents, from letters and memos to pages in a book
- Reads address labels and package information and instructions
- Easily recognizes U.S. currency
- Displays each sentence visually and highlights each word as it is read
- Stores thousands of pages using easily obtainable flash memory
- Transfers text files to and from computers or Braille note takers
- Adjusts reading speed to suit user's preference.

Tap Tap See – free or subscription service apple or android

TapTapSee is a mobile camera application designed specifically for the blind and visually impaired users. The app utilizes the iDevice's camera and VoiceOver functions to photograph objects and identify them out loud for the user.

TapTapSee enables the user to double tap on the device's screen to photograph any two or three dimensional object at any angle, have it accurately analyzed, and defined within seconds. The iDevice's VoiceOver then speaks the identification audibly to the user.

Moreover, TapTapSee includes the following additional features: Repetition of the last image's identification, ability to upload images from the camera

roll, share identification via Twitter, Facebook, text or email, rotor reader, flash toggle, and the ability to save the identified image to the camera roll with the attached tag.

1. 50 Picture Pack for \$4.99 (no time limit)
2. 100 Picture Pack for \$7.99 (no time limit)
3. One Month of Unlimited Pictures for \$9.99
4. Three Months of Unlimited Pictures for \$24.99

My Script calculator – free apple or android

With MyScript© Calculator, perform mathematical operations naturally using your handwriting.

**** The Free handwriting calculator for your iPhone or iPad ****

Easy, simple and intuitive, just write the mathematical expression on the screen then let MyScript technology perform its magic converting symbols and numbers to digital text and delivering the result in real time.

Get the same experience as writing on paper with the advantages of a digital device (scratch-outs, results in real time, etc.).

Solve mathematical equations by hand without actually having to crunch the numbers yourself.

BENEFITS AND FEATURES

- Write and calculate mathematical expressions in an intuitive and natural way with no keyboard
- Scratch-out gestures to easily delete symbols and numbers
- Undo/redo feature
- Copy your results to the clipboard or export them to other apps.

Be my eyes – free apple

Be the eyes for a blind person in need of help remotely through a live video connection if you are sighted or be assisted by the network of sighted users if you are blind.

Be My Eyes is all about contributing to and benefiting from small acts of kindness, so hop on board and get involved!

Blind users can request help from a sighted person and the sighted users will then be called for help. As soon as the first sighted user accepts the

request for help a live audio-video connection will be set up between the two and the sighted user can tell the blind person what she sees when the blind user points his phone at something using the rear-facing camera.

As a sighted user you don't need to worry about missing a call and 'leave a blind person hanging' - you are a part of the bigger Be My Eyes helper-network and we will find the next available sighted person in the network. The challenges that the blind person needs help with can be anything from knowing the expiry date on the milk to navigating new surroundings.

Note: We encourage blind users to be patient when requesting help because we rely on real people to help you.

- Live audio-video connection between blind and sighted users
- Add the languages you know under settings
- An easy way you can make a difference for blind people

Eyernote – free apple

EyeNote is a mobile device application to denominate Federal Reserve Notes (U.S. paper currency) as an aid for the blind or visually impaired to increase accessibility. Users can have the denomination of a note scanned and communicated back to the user.

Looktel Recognizer– \$9.99 apple

LookTel Recognizer allows those persons having visual impairments or blindness to identify cans, packages, ID or credit cards, DVDs, and similar items. Customers can store images of objects in a library or database, and then point the iPhone's camera at an object and the phone will recognize and describe the item instantly. A barcode scanner is included to provide additional labeling help.

LookTel Recognizer is powered by an evolution of NantWork's Internet of Thought™ data linking services in LookTel's "Money Reader", an app that has helped thousands of customers with visual impairments or blindness to instantly identify and count more than 20 paper currencies. Like MoneyReader, Recognizer uses state-of-the-art recognition technology.

Recognition happens instantly, in real-time, without having to hold the

camera still to capture a photo, then wait for a result. Recognizer can be used at any location, anytime, as the app needs no internet connection.

Recognizer provides customers backup support through export of the Library items via EMail, enabling the restoration of a database from lost or replaced devices. Sharing items with other members of the community is made easy via this email export.

Tune In Radio – free apple or android

itunes Radio – free apple

Check out iTunes Radio on your iPhone, iPad, iPod touch, Mac, PC, or Apple TV.¹ iTunes Radio has streaming stations you'll love from day one — like DJ-curated or genre-specific radio stations, all with crystal-clear sound quality. And iTunes Radio includes First Plays, so you can listen to selected full albums before buying them. Your stations evolve based on the music you play and download. So the more you use iTunes Radio and iTunes, the more iTunes Radio knows what you like to listen to — and the more it can play music you'll love.

iHeart Radio – free apple or android

iHeartRadio lets you listen online to the best live radio, sports, news, NPR, podcasts, and streaming music stations based on your favorite artists, songs or albums.

The app includes over 20 million songs covering Pop, Country, Top 40, Hip-Hop, R&B, Alternative, EDM, Rock, Reggae, Blues, House, Dubstep and more. Stream live AM and FM radio stations, experience iHeartRadio

live music events, laugh to the best stand-up comedy and listen to commercial-free custom music.

iHeartRadio is easy to use, and best of all, free. Stream your favorite music, shows and radio stations through:

- For You - Personalized station recommendations tailored to your musical obsessions.
- Favorites - Access your favorite stations right from the iHeartRadio home screen.
- Perfect For - Looking for music to listen to while you work out, chill out, or take a road trip? iHeartRadio has hundreds of stations built to fit any mood or activity.
- Podcasts - Listen to on-demand episodes from the best in News, Sports, Finance, Comedy, and Entertainment.

With iHeartRadio, you can listen to your local radio station from across the country or get into workout mode with a personalized music playlist.

Control your listening experience right from your Apple Watch by pairing it with an iPhone that has iHeartRadio installed. Use Apple Watch's speech technology to quickly access your music simply by saying an artist ("Taylor Swift") or station name ("Z100"). Or listen on the go in your car with Apple CarPlay. You can even stream to your TV with Google Chromecast.

Please let us know how we can improve by sharing your thoughts, wishes and wants at <http://help.iheartradio.com>!

Stay completely up to date by joining our community on Twitter and Instagram @iHeartRadio, where you'll always get the latest music news, contests and access to your favorite artists.

Overcast - Free apple

A powerful yet simple audio podcast player, with features such as Smart Speed, Voice Boost, and Smarter Playlists to help you listen to more podcasts in more places, try new shows, and completely control your experience.

Now includes Apple Watch app, Glance, and notifications!

Note: Some features are locked or limited. The single "Unlock Everything" in-app purchase unlocks them all.

Overcast is a modern, fully featured audio podcast player with many useful features in a simple, intuitive interface:

- Download podcasts for playing anytime, even when offline.
- Search and browse for new podcasts, plus get recommendations from Twitter.
- Create custom Playlists with smart filters and per-podcast priorities, and rearrange the list whenever you want.
- Receive optional push notifications when new episodes arrive.
- Subscribe to a podcast, or just add an episode: try new shows without committing.
- Download podcasts over cellular, set a sleep timer, or use Voice Boost to enhance and normalize speech volume. (Included in Unlock Everything.)
- Adjust playback speed, and use Smart Speed to pick up extra speed without distorting the conversation. (Included in Unlock Everything.)
- Navigate with CarPlay. (On supported car radios.)
- Apple Watch app, Glance, and notifications

Dark Sky App \$3.99 apple

ark Sky can tell you at a glance exactly when it will rain (or snow) up to an hour in advance, so you're free to walk the dog or run out to lunch and know you'll stay dry. You can also explore the most beautiful weather animation you've ever seen, both forward in time or back.

(Dark Sky is available in the US, UK and Ireland.)

YOUR WEATHER, DOWN TO THE MINUTE

Using GPS, Dark Sky is able to create forecasts for your precise location, giving you minute-to-minute predictions for the next hour and detailed forecasts for the next day and week.

BEAUTIFUL WEATHER ANIMATIONS

The same technology that powers Dark Sky's predictions also allows us to make the world's first perfectly smooth radar animation. Other apps show you a chunky slideshow that makes it nearly impossible to tell how storms are moving. But Dark Sky's radar animation lets you see the actual path of

the storm: how it moved in the past, and where it's going in the future.

PUSH NOTIFICATIONS

Dark Sky can send you an alert before it starts raining at your exact location. Even if you haven't opened the app in days, Dark Sky will know when you're in the path of a storm.

TODAY WIDGET

The Dark Sky Notification Center Widget tells you at a glance what's going to happen in the next hour, so you don't even have to unlock your phone to quickly check the weather before heading out.

APPLE WATCH

Dark Sky looks great on your wrist. Get notifications and check out the weather for the next five days with the Dark Sky app built from scratch for Apple Watch.

Blind square app-\$29.99 apple

BlindSquare makes you sense what's around you. The only thing you need to do is listen.

BlindSquare is a new solution that combines the latest technology to help the blind with their daily lives. It has been developed in collaboration with blind people and carefully field tested. You need either an iPhone or an iPad to get started. It also supports some additional accessories to enhance the experience.

How does it work?

BlindSquare uses GPS and the compass to locate you. It then gathers information about the surrounding environment from FourSquare. BlindSquare has some unique algorithms to decide what information is the most relevant and then speaks it to you with high quality speech synthesis. "What's the most popular café within 200 meters radius? Where is the post office or the library?"

Using BlindSquare as a GPS solution:

When you start the app, it will start telling you the interesting places and

street crossings around you. By changing the radius, you can limit the area you are interested in. You can also search by search term or by category. You can select an interesting place from the search results and perform the following tasks:

- 1) Get contact info (address, phone number)
- 2) Open twitter feed or restaurant menu (if provided)
- 3) Make a phone call
- 4) Start tracking the place (BlindSquare will assist you by repeating the distance and the clock face direction)
- 5) Start your favourite navigator for turn-by-turn instructions (TomTom, Navigon or Apple Maps)

BlindSquare is aware of when you travel by car, bus or train and starts to report interesting places in front of you (for example, the next stops) and street crossings when you are passing them.

You can also save your own private places to iCloud so they will be found with your every device.

Using BlindSquare as a FourSquare client:

If you like to play FourSquare, you can do the following with BlindSquare:

- 1) Get a list of nearby FourSquare venues
- 2) When you are in a place, you can check in by shaking your device
- 3) Do a check in with commenting and twitter/facebook sharing
- 4) Correct the location of the place

BlindSquare supports the following languages: English, Spanish, French, German, Italian, Dutch, Finnish, Swedish, Norwegian, Danish, Czech, Russian, Estonian, Polish, Arabic, Turkish, Portuguese, Japanese, Greek, Romanian, Croatian, Hungarian, Korean and Bulgarian.

VoiceOver usage is supported but it also includes higher quality additional speech synthesis by Acapela Text-To-Speech from Acapela Group.

Instructions in English: <http://help.blindsquare.com/instructions> and <http://blindsquare.com/faq>

Google Maps app – free

apple or android

The Google Maps app for iPhone and iPad makes navigating your world faster and easier. Find the best spots in town and the information you need to get there.

- Comprehensive, accurate maps in 220 countries and territories
 - Voice-guided GPS navigation for driving, biking, and walking
 - Transit directions and maps for over 15,000 cities and towns
 - Live traffic conditions, incident reports, and automatic rerouting to find the best route
 - Detailed information on more than 100 million places
 - Street View and indoor imagery for restaurants, museums, and more
- * Some features not available in all countries
- * Continued use of GPS running in the background can dramatically decrease battery life.
